Open Office Collection

Designing Workplaces that Are Ready for Tomorrow

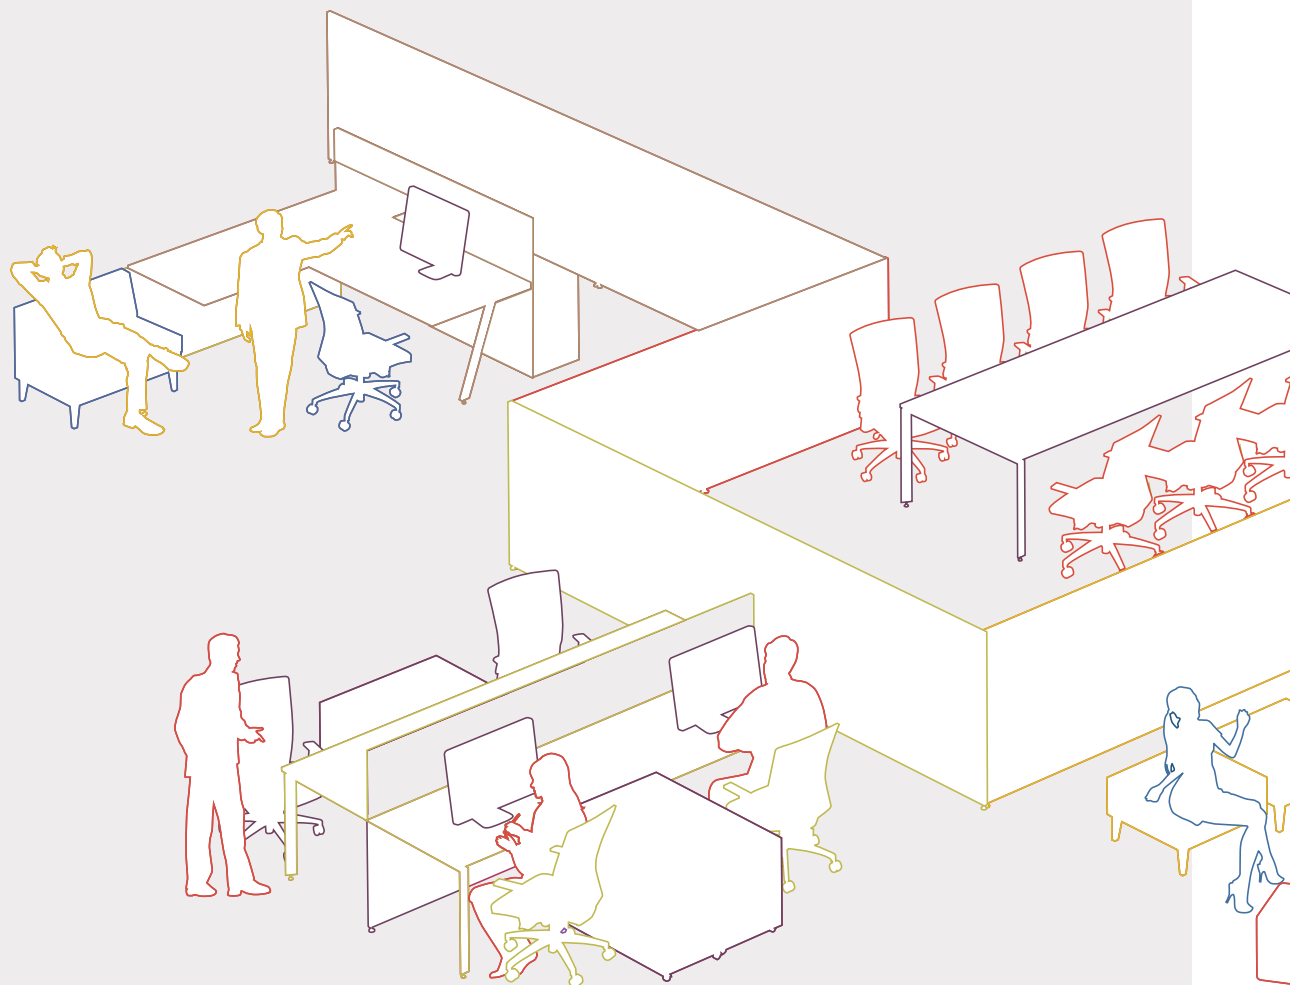

With the walls literally coming down, present-day offices operate with far less compartmentalization and far more interactions and communications. Designed for ever-evolving workspaces and business needs, HNI's Avail Open Office Collection offers highly customizable solutions to deliver high-performance workspaces at a great value. As HNI's flagship open office solution, Avail challenges convention and makes a good office design accessible and attainable.

The Avail Open Office Story

We believe, the right workplace amplifies the potential of any business. By enabling workstations to adapt, spaces to flow intuitively, shared and private spaces to balance evenly, we enable better communication and provide a sense of harmony that leads to higher productivity, happier people and healthier profits.

Collaboration

People achieve more when they work together. It's really that simple. And it really works. Whether it's quick, spontaneous meetings or large inclusive workshops, people need spaces to communicate, to work together and build a sense of community that drives businesses.

Efficiency

An efficient workplace is a more effective workplace. Greater accessibility and mobility help you achieve more with less by making better use of your available space. This enables increased headcount, reduced clutter, clearer focus, enhanced productivity and profitability.

Flexibility

Adaptability, versatility, customization—these are the keys to a modern, multi-functional workplace. It also makes a more future-friendly environment. Office flexibility ensures that your space can evolve with the needs of your business.

Simple Parts for Complete Workplace Solutions

Avail Open Office Collection is made up of an exciting collection of modular components that are designed freely for reconfigurability. Thoughtfully built to adapt to all workplace trends - present and future - Avail's superior versatility enables you to make the most of your space through every iteration of possibilities.
