

crafted **seating**

Seating Solutions

There's more to great chair than just a seat, back and arm. We, at HNI Corporation - the world's leading office seating manufacturing company understand what a great chair should bring to the one being seated. This is the reason we offer you a varied selection of seating options for your office. These chairs have been ergonomically crafted by world renowned designers whose expansive talents ensure you work in both comfort and style

Acuity

Beyond magnificent

Acuity is an ergonomically correct chair that instantly and comfortably fits every user regardless of their body type. In essence, a chair that is designed to adapt you, not the other way around

Designer **BRUCE FIFIELD**

Bruce is a graduate of Industrial design from Rhode Island School of Design (RISD). In 1986, he co-founded Design Continuum Italia, where he provided strategic leadership in design and development prior to opening Studio Fifield in 2010. With over 30 years experience, his innovative design have won him numerous awards, including IDSA, IF, Red Dot, Best of Neocon, and the Compasso D'oro

Vision of comfort and style

When designing Acuity, we began by building a team, ergonomists, physical therapists, researchers and Bruce Fifield of Milan-based Design Continuum Italia to lead the design. Then we watched so we could learn. We examined what people need from their chairs. We scrutinized every detail, and we created a chair to instantly and comfortably fit every user.

Eight-way

positioning lets you type, talk, or slip the arms out of your way for easy get up and go. It allows you to choose the positions of the armrest that suit your posture

Fit-to-body

moving the seat up, down, and back and forth with just the touch at you fingertip

Fit-to-task

with a simple slide control that locks, tightens, or loosens the tilt

**We Call it
Acufit™**

You'll call it a new kind of comfort. A weight-activated mechanism responds to body weight and keeps the seat and back moving in relation to one another during recline, providing the ideal amount of support. So it fits any body and supports every task.

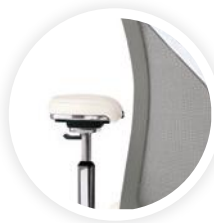

**Acufit™
Ergonomics**

Reflects the
human body.
Supports the
human body.

Conforming mesh back
provides lumbar support and reduces shoulder strain while seated for long hours

Fully adjustable arm
allow you to choose the positions of the armrest that suit your posture

Fit-to-body adjustments
seat depth and height adjustments levers provide excellent range and are logically located at the seat's edge

Fit-to-task adjustments
sliding lever for recline tension and tilt lock is easy use

Lyric

Comprehensive family of seating

Your workplace has stories, created by people and the products that support them. Lyric, HNI's newest comprehensive family of seating, brings a unified look to your entire space. Its comfort and intuitive functionality, paired with its simple yet striking lines, make it a perfect fit for wherever you work.

Designed by **Deisig Design**

To industrial designer Wolfgang Deisig, the most personal—and most important—object in the office is the work chair. Since 1971, when he founded Deisig Design Studio, the Berlin-based design team have focused much of their time and talent designing chairs that welcome the people who use them. Based on deep ergonomic research and the changing ways of working, new and innovative concepts have been developed and have received major international Design Awards

Unified and Cohesive look to entire space

Lyric is the HNI's most comprehensive family of seating and brings a unified, cohesive look to your entire space. We've made it simple to add style and comfort into your environment.

Task chair & stool

The Lyric task chair and stool suit a wide range of applications and users. mesh or upholstered mesh back to provide comfort for all-day sitting.

Side chair

seating solutions come with multiple options such as glides or casters and mesh or upholstered back. Its simple design pairs well with the task chair.

Multi-purpose chair

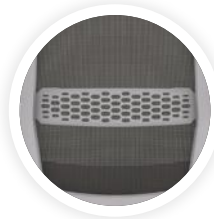

is designed to excel in a multi-use area. This lightweight yet durable design is available with four-leg or sled base for easy use and storage.

Evo

One Chair Many Spaces

People are moving around the workspace to get work done, and the conference room or shared bench has become the home away from home. With intuitive controls, automatic weight-activated tension, and enhanced, long-term comfort Evo is a complete seating offering for wherever and however people work.

Designed by **Studio FIFIELD**

Bruce Fifiield and his namesake studio in Milan, Italy, is best known for masterful orchestration of user insight, technical innovation and design excellence in the creation of award-winning products. Upon graduation from RISD Bruce consulted on the design of office products with Olivetti. Subsequently he co-founded Design Continuum Italia where he led design strategy, user research and the creative direction of new product development. Bruce and his studio have won accolades which include the prestigious Compasso D'Oro, Best of NeoCon, IDA, IF Design, Red Dot, Good and Green Good Design Awards from the Chicago Athenaeum and the Architizer A+ Awards.

Your World of Wellness

Evo is a thoughtfully designed chair focused on ergonomics, its build quality combined with intuitive controls and automatic weight-activated tension ensure healthier performance levels, as well as overall well-being within the workplace.

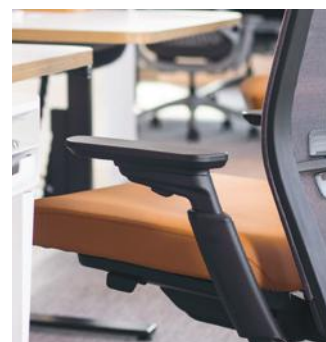

Cohesive design

The Evo family is adaptable and interchangeable for use in multiple spaces

Personalized comfort

Open arms allow for multiple sitting posture and remain lateral when reclining for maximum support

Intuitive options

Easy-to-reach, up-front controls allow fingertip access and ergonomic adjustment

**Our design,
your comfort**

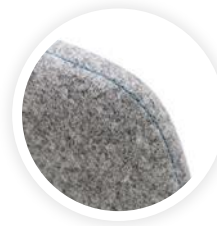

Evo chairs feature weight-activated recline so there's no additional tension adjustment. Intuitive controls, along with specially sculpted and formulated seat foam, create a comfortable sitting experience for wherever and however people work.
